

Jay Li

Software Engineer

Profile

I'm a software engineer who loves to see magic happen and problems solved from my lines of code. In addition, I love to work in teams and make meaningful connections with people to help each other learn and grow.

Employment History

Technical Analyst at Wood PLC

February 2018 – Present

- Worked within asset management teams to deliver inspection and turnaround maintenance scopes.
- Primarily worked on database management and data manipulation as well as querying SQL data to create progress reports.
- Developed scripts and programs for the team to reduce complexity and time of repetitive tasks.
- I'm grateful for the time I spent with different clients alongside brilliant engineers; whose work gave me a glimpse into the challenges and rewards of an engineer's life.

Founder at UltraVe

September 2018 – Present

- UltraVe is a social media community and online clothing company that promotes healthy eating and a cruelty-free lifestyle.
- I have learned the importance of online marketing and online presence that comes from search engine optimization (SEO) and ongoing community building.
- This small project has taught me how to work on tasks independently: site creation, product sponsoring, graphic designs, customer support etc.
- As a way to give back, a portion of the proceeds go to animal rescue and shelters.

Private Tutor

December 2015 – September 2018

- Graduated school with a body of knowledge that I wanted to give back to the local community.
- Focused on 12th grade Mathematics, Physics and Chemistry.
- By the end of the school year, my students achieved grade A from lower grades; 2 of which earned a Dux Award (Top ranked student of the year group).
- 1000+ hours of teaching experience.

Food and Beverage Attendant at RAC Arena

September 2017 – July 2018

- Cashier and customer service
- Responsibly served alcoholic beverages
